

PCC Advancements in Low Vision Rehabilitation in more detail

Oregon Academy of Ophthalmology
 Ophthalmic Technicians/Assistants Program
 2026
 Portland, Oregon

David B Davis, II, MD, FACS, ABES
 Capt. (MC) USN, Retired
 Instructor, Portland Community College, OMT Program
 Formerly, Medical Director Optima Ophthalmological Medical Associates
 Hayward, CA

I Have no financial interest in any product mentioned in this lecture.

QAO March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 1

1

PCC Students often ask me Why do I talk to myself

Sometimes I need expert advice.

QAO March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 2

2

PCC Macular Degeneration

- Primarily a loss of central vision
- Estimate > 20 million in US
 - > Under 5% population age 40-50
 - > 30% population by age 80 -84
- Around 2 million with advanced AMD
- About 50,000 new cases of blindness each year from AMD

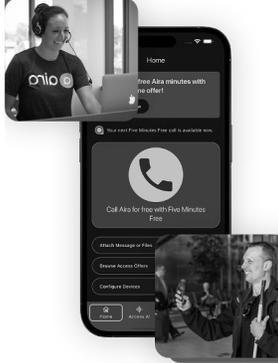

QAO March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 3

3

PCC

Indoor Navigation and Shopping

- ARIA app - A free (usually) app for iPhone /android / tablets
- Walmart, Target, Gucci, Starbucks
- Professional visual interpreters to find & describe items, help checkout

QAD March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 4

4

PCC

Indoor Navigation and Shopping

Walmart | Retail, Online & Online | Visual Interpreting | Environment

Paula Margeson
Walmart customer and ARIA user

The more technology allows me to be independent.

QAD March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 5

5

PCC

Indoor Navigation and Shopping

- ARIA Access Partners Include
 - > Some airports
 - > Some Universities – Western WA U.
 - > Some museums
 - > Some transportation agencies – C-Tran, Vancouver
 - > Some government agencies
 - > Some entertainment places

QAD March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 6

6

PCC

Indoor Navigation and Shopping

- ARIA Cons
 - > Some applications described as user-unfriendly, slow, and difficult to use'
 - > Slow performance at times
 - > Inconsistent support across services
 - > Not in all major big stores

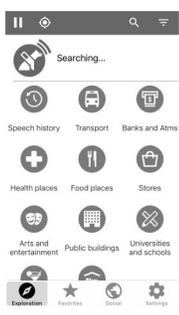

QAD March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 7

7

PCC

Navigation

- Lazarillo app
 - > Voice guidance for outdoor and indoor navigation
 - > Interactive digital maps for navigation indoor and outdoor
 - > Free for iPhone / androids

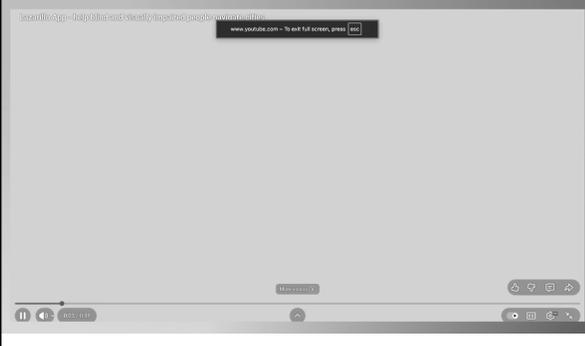

QAD March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 8

8

PCC

Navigation

QAD March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 9

9

PCC

Navigation

- Lazarillo app pros
 - Free for iPhone / androids
 - User friendly
 - Customizable – text to speech speed, amount of information available
 - Comprehensive guidance – turn by turn directions and announces street names, intersections, points of interest

OAG March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 10

10

PCC

Navigation

- Lazarillo app cons
 - Internal voice conflicts making hard to understand in certain situations
 - Inaccurate business data –
 - ✦ some outdated/fictional
 - Limited external voice integration

OAG March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 11

11

PCC

Envision

- Envision AI app for smart phones
 - OCR/Text to speech in many languages (>60)
 - Object recognition & identify previously taught faces
 - Scene descriptive – “there’s a table...”

OAG March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 12

12

PCC

Envision

- **Envision AI app**
 - Describe images
 - Find people in crowds
 - Scan barcodes
 - Answers questions about scene text, etc.

QAD March 2013 Ophth Tech Program
David B Davis II, MD, FACS, ABES
13

13

PCC

Envision

- **Envision AI app Cons**
 - Not hands free
 - Depending on lighting, camera quality, recognition less reliable
 - Using camera + AI drains battery
 - Some features may require internet
 - Learning curve
 - Costs: \$40/yr or \$200 lifetime, but some basic core features are free

QAD March 2013 Ophth Tech Program
David B Davis II, MD, FACS, ABES
14

14

PCC

Envision app + Envision smart glasses

- **Many versions: \$1900 - \$3500**
 - Built in camera constantly “see” what is in front and describes it
 - Fully hands free
 - OCR Text to speech
 - Scene/object description
 - Face recognition (learned)
 - Light and color detection
 - AI is built on Chat GPT-4 base

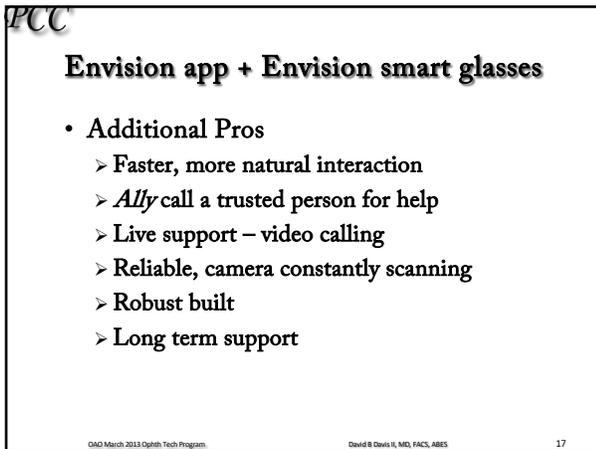

QAD March 2013 Ophth Tech Program
David B Davis II, MD, FACS, ABES
15

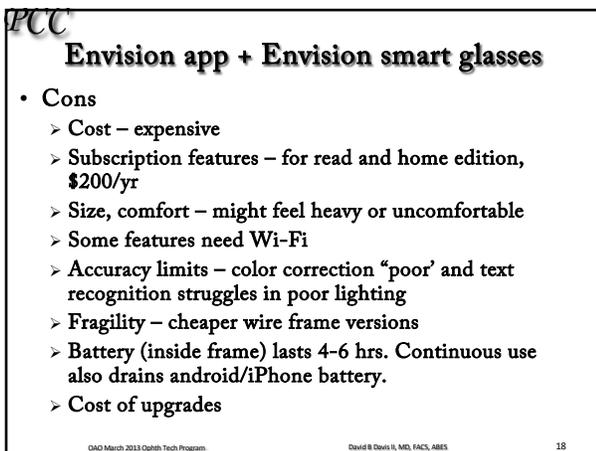

15

16

17

18

PCC

Ally Solo Smart Glasses

- A cheaper \$700 (\$599) lightweight, simpler smart glasses that is primarily designed for navigation, reads, object recognition.
- Compact, comfortable, wearable
- Long battery life
- AI assistant “Ally” runs via a companion smartphone app
- Can use with envision AI, but not all of envision features work with it

OMD March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 19

19

PCC

Ally Solo Smart Glasses

OMD March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 20

20

PCC

Ally Solo Smart Glasses Cons

This video was made by professionals under all the special hinges needed, support, Wi-fi, etc. Not that well developed yet.

- Mixed User experience / reliability issues
- Inconsistent AI results and occasional errors
- Dependence on voice/potentially awkward in noisy environment
- Learning curve and usability frictions
- Price
- Not a replacement for true vision – still limited. Not AR glasses that project vision. Don't see the world, get descriptions.
- A promising but still evolving assistive tool

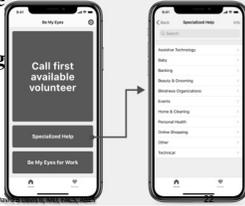

OMD March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 21

21

PCC

Be My Eyes App

- **Be My Eyes Volunteers**
 - This app connects users with volunteers or AI agents to describe images, read text, or provide visual support.
 - Totally free
 - Over 2m volunteers world-wide
 - For real time events – camera
 - Send fotos, text, etc. for reading
 - App Icon

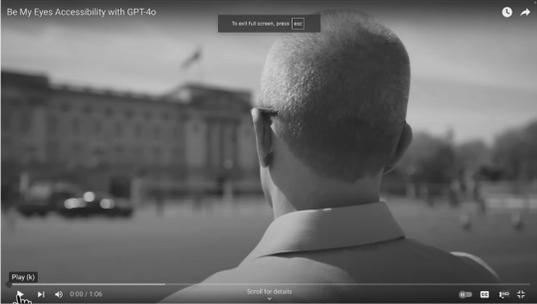

OAMD March 2013 Ophth Tech Program

22

PCC

AI Powered Apps – BeMyEyes Virtual Volunteer (Beta)

Be My Eyes can be paired with Ray Ban Meta Smart Glasses
Barilla cookings. 9.5m live volunteers
David B Davis II, MD, FACS, ABOS

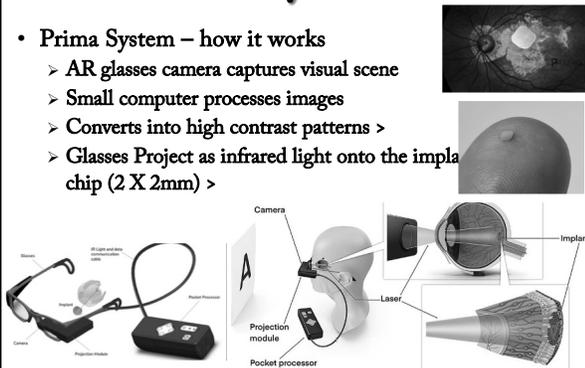

OAMD March 2013 Ophth Tech Program

PCC

Bionic Vision System – for GA

- **Prima System – how it works**
 - AR glasses camera captures visual scene
 - Small computer processes images
 - Converts into high contrast patterns >
 - Glasses Project as infrared light onto the impla chip (2 X 2mm) >

OAMD March 2013 Ophth Tech Program

24

PCC

Bionic Vision Systems

- Prima System for GA – how it works
 - Convert light into electrical impulses
 - Mimic the natural activity of retinal cells
 - Stimulating the remaining healthy inner retinal neurons (bipolar & ganglion cells) > optic nerve

QMD March 2013 Ophthalm Tech Program David B Davis II

25

PCC

Prima System for GA

- 38 patients, VA \leq 20/320 in at least one eye
- 84% patients had increase 5 lines vision
- Mean VA remained stable after implantation
- Takes many months for patient to learn to see with this
- The visual field GPT says about 7 degrees ????
- No significant 12 moth complications

QMD March 2013 Ophthalm Tech Program David B Davis II, MD, FACS, ABOA

26

PCC

Prima System for GA

- Prima System Update 10/25
 - Limited by only Black and white 100u pixels, 378/chip
- Future in development
 - New chip: 20u, up to 20,000/chip
 - Chip with full grayscale – allow facial recognition
 - Potential to 20/80 and with electronic zoom 20/20?
 - Awaiting FDA approval for next stage

QMD March 2013 Ophthalm Tech Program David B Davis II, MD, FACS, ABOA

27

PCC

Other Aids

Time does not permit me to discuss other Low Vision Aids at this time. In your notes, at the end of this presentation are a few slides on optical and electronic magnification devices.

CMAA March 2013 Ophthalm Tech Program David B Davis II, MD, FACS, ABES 28

28

PCC

What I have learned
from 91 years of living

**MY ENTIRE LIFE CAN BE
SUMMED UP IN ONE
Sentence...**

CMAA March 2013 Ophthalm Tech Program David B Davis II, MD, FACS, ABES 29

29

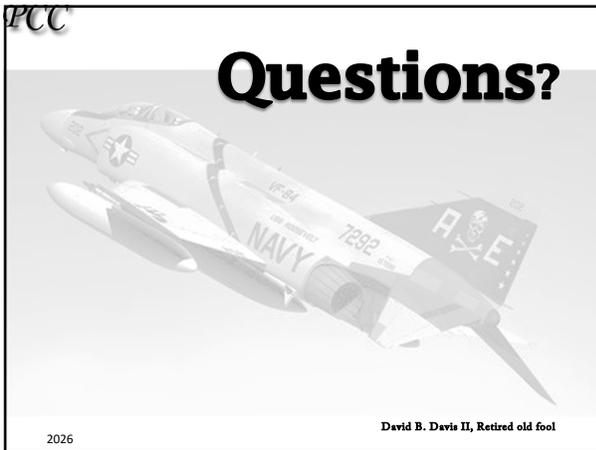

PCC

**WELL, THAT DIDN'T GO
as planned** ^α

PCC

Optical & Electronic Magnific

- Merlin Elite Pro 24"
 - > Large screen Magnifier – full HD 1080
 - > Zooms – up to 70x with autofocus
 - > Change Contrast, background
 - > Easily identified controls for visually handicapped
 - > OCR / Text to speech - >30 languages
 - > XY table easily movable
 - > Can be used as monitor for computer or tablet

OMD March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 34

34

PCC

Cons of Merlin

- Heavy - > 40 lbs - needs dedicated desk space
- Expensive – about \$4650
- Learning curve for those not familiar with assistive tech
- Needs dedicated power outlet
- Latency – Like all CCTVs, there may be some small latency or lag compared to looking with your own eyes
- OCR can misread depending on quality of print and paper

OMD March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 35

35

PCC

Others

- There are multiple types and sizes on the market
- There are lightweight portable optical& electronic magnifiers
- This is a rapidly changing environment now that AI is here.

OMD March 2013 Ophth Tech Program David B Davis II, MD, FACS, ABES 36
